Lin Yi-Shan

Frontend developer

📍 Taipei City, Taiwan

國立臺灣師範大學 資訊教育研究所

A passionate and self-motivated Full-Stack Developer with three years' experience focusing on React, TypeScript and PHP.

Passionate about building new applications and features from scratch.

With a background in education, design and computer science, I am a lifelong learner and enjoy helping others acquire new skills and develop effectively with people from diverse backgrounds.

- Web Security
- High concurrent system

Backend

- PHP
- MySQL
- Python Flask
- Postman
- Swagger

Database

- Normalization
- Performance tuning
- GCP
- AWS

Tools

- Git
- Github/Gitlab cicd
- Eslint, Prettier
- Node.js
- Notion

Test

- Unit test/E2E test
- Storybook
- Nightwatch.js
- Jest

工作經歷

Frontend Developer · 25sprout

2020.07 - Present

- Actively participated and contributed to 8 projects and collaborated closely with 2-4 team members to collectively achieve project goals and deliver high-quality outcomes.
- Assumed leadership roles within projects, effectively coordinated team efforts and provided mentorship and guidance to 3 interns.
- Possess skills in modern front-end frameworks like React and TypeScript, with experience in Vue and Pug.
- Using Storybook and Jest for UI development, testing, and documentation to enhance code stability.
- Successfully resolved cross-browser compatibility issues to ensure seamless content display across different browsers.
- Strived to complete projects on time and within budget, ensuring client satisfaction and fostering long-term partnerships.
- Continuously sought to learn industry trends and emerging technologies, constantly improving professional skills and knowledge.
- Adapted well to fast-paced collaborative environments, committed to achieving or surpassing project objectives.
